SUMMARY

Microsoft and DataCamp certified Data Analyst with 8 months of professional experience working on business data from U.S.-based companies. Currently pursuing a Master's in Applied Statistics, with 3+ years of training in data collection, transformation, statistical analysis, visualization, and machine/deep learning.

SKILLS AND EXPERTISE

Programming Languages: Python (*numpy, pandas, matplotlib, seaborn, scikit-learn, pyspark, tensorflow, scipy, flask, beautifulsoap4*), MATLAB, Fortran, C++, R (*currently learning*)
Data Analysis Tools: SQL, Excel, PowerBI, MS Fabric
Other Tools: GitHub, MS Office, Wordpress

WORKS EXPERIENCE

Graduate Research Assistant *Aug 2025 - Ongoing*
Office of Academic Assessment , BGSU)

- Working as a Data Analyst with student learning outcomes data from BGUS, NSSE, and similar sources. I collect, clean, and transform data in Excel and create Power BI reports that deliver actionable insights to help university authorities enhance the student experience.
- Designed and deployed effective surveys for data collection, integrated them into the website, email and optimized distribution to improve response quality and volume.

Junior Data Analyst *Nov 2024 - Jun 2025*
Data Crafters (Microsoft Solution Partner)

- Oversee maintenance and post-project support for a business service client, ensuring sustained value and optimized Power BI performance. These efforts drive efficiency and support long-term strategic goals.
- Gather data requirements and coordinate with a real-state company stakeholders to acquire and prepare data for efficient Power BI modeling, enabling effective dashboard development in future.
- Engaged in hands-on learning and application of Microsoft's data analysis tools like Fabric, Power BI and Excel. Gained practical experience in data modeling, scalability, maintainability, analysis, and visualization.

EDUCATION

Bowling Green State Univeristy *Aug 2025 - Ongoing*
MS in Applied Statistics (Business Analytics Specialization)

University of Dhaka *Jan 2018 - Feb 2024*
B.Sc. in Mathematics, CGPA: 3.47/4.00

CERTIFICATIONS / AWARDS

- **Power BI Data Analyst(PL-300)**, **Fabric Analytics Engineer (DP-600)**, **Azure Data Fundamentals (DP-900)**, by Microsoft
- **Data Scientist Professional Certification**, **Data Analyst Professional Certification**, by Datacamp

PERSONAL PROJECTS

Big Data Analytics on DataCo Supply Chain Datasets using PySpark

- Analyzed datasets with 180,519 and 469,977 records using PySpark, addressing 13 business questions to uncover key insights aimed at increasing profit and reducing fraud.

Business Case Study - Recipe Website's High Traffic Prediction

- Developed a predictive model to identify recipes driving high traffic on a business website with 895 entries. Presented KPIs and business insights in a report and presentation for stakeholders.

Power BI Dashboard Design - Business Analysis

- Developed dynamic Power BI dashboards, transforming complex datasets into actionable insights, showcasing expertise in data visualization, DAX, and data modeling for informed decision-making.
